1. A survey of 545 college students asked: What is your favorite winter sport? And, what type of college do you attend? The results are

College Type	Snowboarding	Skiing	Ice Skating	Total
Junior College	68	41	46	155
Four-Year College	84	56	70	210
Graduate School	59	74	47	180
Total	211	171	163	545

Using these 545 students as the sample, a student from this study is randomly selected.

- (a) What is the probability of selecting a student whose favorite sport is skiing? (5%)
 - (b) What is the probability of selecting a junior-college student? (5%)
 - (c) If the student selected is a four-year-college student, what is the probability that the student prefers ice skating? (5%)
 - (d) If a graduate student is selected, what is the probability that the student prefers skiing or ice skating? (5%)
2. Most four-year automobile leases allow up to 60,000 miles. If the lessee goes beyond this amount, a penalty of 20 cents per mile is added to the lease cost. Suppose the distribution of miles driven on four-year leases follows the normal distribution. The mean is 52,000 miles and the standard deviation is 5,000 miles.
- (a) What percent of the leases will yield a penalty because of excess mileage? (5%)
 - (b) If the automobile company wanted to change the terms of the lease so that 25% of the leases went over the limit, where should the new upper limit be set? (5%)
 - (c) One definition of a low-mileage car is one that is 4 years old and has been driven less than 45,000 miles. What percent of the cars returned are considered low-mileage? (5%)
3. The probability that a married man watches Program A is 0.6, and the probability that a married woman watches the same program is 0.5. Given that a wife watches the program, the conditional probability that her husband also watches it is 0.8. Find the probability that at least one of the spouses watches the program. (10%)

4. The Coca-Cola Company reported that the mean per capita annual sales of its beverages in the United States was 423 eight-ounce servings. Suppose you are curious whether the consumption of Coca-Cola beverages is higher in Atlanta, Georgia, the location of Coca-Cola's corporate headquarters. A sample of 25 individuals from the Atlanta area showed a sample mean annual consumption of 460.4 eight-ounce servings with a standard deviation of 101.9 ounces. Using $\alpha = 0.05$, do the sample results support the conclusion that mean annual consumption of Coca-Cola beverage products is higher in Atlanta? (10%)
5. A researcher reports survey results by stating that the standard error of the mean is 20. The population standard deviation is 500.
 - (a) How large was the sample used in this survey? (5%)
 - (b) What is the probability that the point estimate falls within a range of ± 25 units from the population mean? (10%)
6. Do social recommendations increase ad effectiveness? A study of online video viewers compared viewers who arrived at an advertising video for a particular brand by following a social media recommendation link to viewers who arrived at the same video by web browsing. Data were collected on whether the viewer could correctly recall the brand being advertised after seeing the video. The results were:

Arrival Method	Correctly Recalled the Brand	
	Yes	No
Recommendation	407	150
Browsing	193	91

At a 0.05 level of significance, determine whether brand recall is higher following a social media recommendation than with only web browsing. (10%)

7. Following is a portion of the computer output for a regression analysis relating y = maintenance expense (dollars per month) to x = usage (hours per week) of a particular brand of computer terminal.

The regression equation is $Y = 6.1092 + .8951 X$

Predictor	Coef	SE Coef
Constant	6.1092	0.9361
X	0.8951	0.1490

ANOVA

Source	DF	SS	MS
Regression	1	1575.76	1575.76
Error	8	349.14	43.64
Total	9	1924.90	

- (a) Write the estimated regression equation. (5%)
- (b) Use a t test to determine whether monthly maintenance expense is related to usage at the .05 level of significance. (10%)
- (c) Use the estimated regression equation to predict monthly maintenance expense for any terminal that is used 25 hours per week. (5%)
